Source: 1994-1999 Birth, Death and Fetal Death Certificate files for NJ resident mothers from the Center for Health Statistics.

Birth rates are computed per 1,000 population

Infant Mortality Rates in this table are based on infant deaths <365 days old occurring to resident births between 1994-1999 from Death Certificate files (numerator) per 1,000 live births between 1994-1999 based on Birth Certificate files (denominator).

Fetal death rates are computed per 1,000 live births plus fetal deaths.

Low Birthweight = less than 2,500 grams (5 lb, 8 oz).

Preterm birth = births with less than 37 weeks of gestational age.

No Prenatal Care = month of prenatal care initiation recorded as none.

Black Infants Better Survival (BIBS)

<http://www.state.nj.us/health/bibs/>

First Trimester Prenatal Care = initiation of prenatal care within three months of pregnancy.

Cases where preterm, prenatal care or trimester of prenatal care use cannot be determined are excluded from the rates calculated in those categories.
